CONTENTS OF VOLUME XVII.

NUMBER XLIX.

Page.

ART. I. Eulogy on Von Buch; by Professor COTTA, - - 1

II. Extracts from the Report on the Geology of the Lake Superior Land District; by J. W. FOSTER, and J. D. WHITNEY, 11

III. Analysis of Tin Pyrites; by Dr. J. W. MALLET, - - 33

IV. Notice of the Hail Storm which passed over New York City, on the first of July, 1853; by Professor ELIAS LOOMIS, 35

V. Description of a Tertiary Rainbow; by CHARLES HARTWELL, 56

VI. The Earl of Rosse's Telescopes, and their Revelations in the Sidereal Heavens; by Rev. W. SCORESBY, D.D., F.R.S., etc., 58

VII. Researches on the Development of Viviparous Aphides; by WALDO I. BURNETT, M.D., - - - - - - - - 62

VIII. Mineralogical Contributions; by JAMES D. DANA, - - 78

IX. Reviews and Records in Anatomy and Physiology; by WALDO I. BURNETT, - - - - - - - - - 89

X. Biography of Berzelius; by Professor H. ROSE, - - 103

XI. Correspondence of M. JEROME NICKLÈS—Obituary: François Arago, 113.—Academy of Sciences: Views on the origin of terrestrial magnetism, 116.—Artificial magnets: Ascensional force of Balloons in water, 118.—Manufacture of Sal-ammoniac from the residues of gas works: Separation of bromine from iodine: Artificial Silicification of limestones, 119.—Vitrification of Photographic pictures: Photographic Portraits on linen cloth: Pyrogallic acid in wood vinegar, 120.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the polarization of light by refraction through a metal: Additional experiments on the internal dispersion of light, 121.—On Chemical affinity: On the supposed new metal, Aridium, 122.—Preparation of pure Caustic Potash: Density of Selenium: New Alkaloids, 123.—Preparation of Valerianic Acid from Fusel Oil: Constitution of Butter, 124.—Preparation of Ferrocyanhydric Acid: Separation of Nickel from Cobalt: On a general method of volumetric analysis, 126.—Volumetric determination of manganese, 126.—Vessels for the preservation of fluohydric acid, 127.

Mineralogy and Geology.—Parophite: Crystalline limestone of the Vosges: Pyromeride of the Vosges, 127.—Pitchstone from the trap of Isle Royal: Oxyd of Zinc: Crystallized Furnace Products: Fibrous amianthoid substance, a furnace product from Westphalia: Dolomite: *Pseudomorphous Minerals:*—Pinite after Labradorite, 128.—Karpholite after Wolfram: On Serpentine after Hornblende, Augite, Diallage, Schillerspar: On White lead ore after Linarite: On the waters of the Great Salt Lake, Rocky Mountains, by Dr. L. D. GALE: On the waters of the Warm and Hot Springs of Salt Lake City, by Dr. L. D. GALE: Analyses of several native Borates, by Prof. BECHI, viz., Lagonite, Hayesine, Borax, Larderellite, 129.—On Melan-Asphalt, by C. M. WETHERILL: Thalia, 130.—A new Meteorite from Tennessee, by Prof. J. LAWRENCE SMITH: On the Identity of Owenite and Thuringite, by Prof. J. LAWRENCE SMITH: On the probable depth of the Ocean of the European Chalk Deposits, by Prof. H. D. ROGERS, 131.

Botany and Zoology.—Salad for the Solitary, by an Epicure, 132.—Lindley, The Vegetable Kingdom, or the Structure, Classification and Uses of Plants: De Candolle's Prodromus: Observations on the habits of certain Crawfishes, by Dr. R. P. STEVENS, 133.

Miscellaneous Intelligence.—On the Earthquake at Manilla of Sept. 16, 1852, 135.—The Koh-i-noor Diamond, by Prof. TENNANT, 136.—Abstract of a Meteorological Register, kept at Knoxville, Tennessee, by O. W. MORRIS, 139.—On the Binocular Microscope, and the Stereoscopic Pictures of Microscopic Objects, by Prof. C. WHEATSTONE, F.R.S., 140.—On the periodic and non-periodic variations of Temperature at Toronto in Canada from 1841 to 1852 inclusive, by Colonel EDWARD SABINE, R.A., 143.—On Periodical Laws in the larger Magnetic Disturbances, by Capt. YOUNGHUSBAND, R.A., F.R.S., 144.—Mode of Determining the Optical Power of a Microscope, by Prof. HARTING, 146.—On an Instrument for taking Soundings, by F. MAXWELL LYTE, Esq., 149.—Louis Sœmann: Cabinet of Minerals for sale: *Obituary*—JAMES E. TESCHEMACHER: Die Kreidebildungen von Texas, und ihre organischen Einschlüse, von Dr. FERD. ROEMER, 150.—Geological Map of Keweenaw Point, Lake Superior, Michigan, by J. D. WHITNEY: People's Journal, 151.

List of Works, 152.

NUMBER L.

Page.

ART. XII. On the Elastic Force of Heated Air, considered as a Motive Power; by Prof. FREDERICK A. P. BARNARD, - 153

XIII. Researches on Globuliferous Rocks; by M. DELESSE, - 168

XIV. Examination of some Deep Soundings from the Atlantic Ocean; by Prof. J. W. BAILEY, - - - - - - 176

XV. On some New Localities of Fossil Diatomaceæ in California and Oregon; by Prof. J. W. BAILEY, - - - - - 179

XVI. Analysis of Beryl from Goshen, Mass.; by Dr. J. W. MALLET, 180

XVII. On the Silurian System of the Lake Superior Region; by JAMES HALL, - - - - - - - - - - - 181

XVIII. On the Theoretical Relations of Water and Hydrogen; by T. S. HUNT, - - - - - - - - - - 194

Page.

XIX. Notice of a Geological Map of the United States and the British Provinces of North America, by J. Marcou, - - 199

XX. On the Chemical Composition of the minerals Algerite and Apatite; by J. D. Whitney, - - - - - - - 206

XXI. Contributions to Chemical Mineralogy; by James D. Dana, 210

XXII. On Microscopes with large Angles of Aperture; by Dr. E. D. North, - - - - - - - - - 221

XXIII. Further Notes on Cereus giganteus of Southeastern California, with a short account of another allied species in Sonora; by Dr. George Engelmann, - - - - - 231

XXIV. On the Composition of Recent and Fossil Lingulæ, and some other shells; by W. E. Logan, F.R.S., and T. S. Hunt, 235

XXV. On a new Meteorite from New Mexico; by Dr. F. A. Genth, 239

XXVI. Introductory Essay, in Dr. Hooker's Flora of New Zealand, 241

XXVII. On the relations which exist between Friction and Pressure; by M. J. Nicklès, - - - - - - - 252

XXVIII. Abstract of a Meteorological Journal, for the year 1853, kept at Marietta, Ohio; by S. P. Hildreth, M.D., - - 255

XXIX. On the Eye and the Organ of Hearing in the Blind Fishes of the Mammoth Cave; by Jeffries Wyman, M.D., - 258

XXX. Additional Note to Researches on the Development of the Viviparous Aphides; by W. I. Burnett, M.D., - - 261

XXXI. Correspondence of M. Jerome Nicklès—Academy of Sciences: Election of a Perpetual Secretary, 262.—Publication of the works of Arago and Laurent, 263.—Death of Theodore Olivier: On the Proximate principles of Bran of Wheat, 264.—On the Ammonia contained in Rain-water: Heating of Wire by the Voltaic Current, 265.—Various Memoirs, 266.—Chemical reactions effected under the influence of High Pressure: Heating Apparatus, 267.—Economical Manufacture of Bi-chromate of Potash, 269.—Photography, 270.—On four new Quinquinas, 271.

Appendix.—Notice of a collection of Fishes from the southern bend of the Tennessee River, Alabama; by L. Agassiz, 297

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Bartlett's Elements of Analytical Mechanics, 271.—Darstellung der Farbenlehre und optische Studien von H. W. Dové: Einleitung in die höhere Optik von Dr. August Beer, 272.—Die Lehre von der Reibungselektricität von P. T. Reiss, 273.—On the Absolute Zero of the Perfect Gas Thermometer, by W. J. Macquorn Rankine, Esq.: Aridium, by Campbell Morfit and James C. Booth, 274.—

Note to J. D. DANA'S Contributions to Chemical Mineralogy: On the Production of Crystalline Structure in Crystallized Powders, by Compression and Traction, by Sir DAVID BREWSTER, K.H., D.C.L., F.R.S., etc., 275.

Geology.—On the Gold Fields of Victoria or Port Philip, by H. G. WATHEN, Esq., 279.—On the Structure of Agate, by THEODORE GÜMBEL, 284.

Botany and Zoology.—Fungi Caroliniani Exsiccati, by H. W. RAVENEL: Comparative Anatomy, by C. TH. v. SIEBOLD and H. STANNIUS. Translated from the German and Edited with Notes and Additions, by WALDO I. BURNETT, M.D., 285.

Astronomy.—New Planet Euterpe: New Comet, 286.

Miscellaneous Intelligence.—Contributions to Meteorology, by CHARLES SMALLWOOD, M.D., 287.—Tornado in Knox Co., Ohio, Jan. 20, 1854: Discovery in Photography, 290.—Fishes of Northern New York—Frozen Fish, 291—American Association for the Advancement of Science: Cabinet of Minerals for Sale: Cameroceras trentonense and Orthis Verneuili, 292.—*Obituary*—J. E. Teschemacher, 292—Outline of the Geology of the Globe and of the United States in particular, with two Geological Maps, etc., by EDWARD HITCHCOCK, D D., LL.D.: The Microscope in its special application to Vegetable Anatomy and Physiology, by Dr. HERMANN SCHACHT. Translated by FREDERICK CURREY, Esq., M.A: Explanations and Sailing Directions, to accompany the Wind and Current Charts, by M. F. MAURY, LL.D., Lieut. U. S. N., 295.—The Annals of Science, conducted by HAMILTON L. SMITH, A.M.: Transactions of the American Philosophical Society, Philadelphia, 296.

NUMBER LI.

Page.

ART. XXXII. The Primitive Diversity and number of Animals in Geological Times; by L. AGASSIZ, - - - - - - 309

XXXIII. New Localities of Meteoric Iron; by CHARLES UPHAM SHEPARD, - - - - - - - - - - - - 325

XXXIV. Description of Meteoric Iron from Putnam County, Georgia; by Prof. J. E. WILLET, - - - - - - 331

XXXV. On Conistonite, a new Mineral Species; by R. P. GREG, F.G.S., - - - - - - - - - - - - 333

XXXVI. Introductory Essay in Dr. Hooker's Flora of New Zealand, - - - - - - - - - - - - 334

XXXVII. Remarks on the Mineral species Algerite; by T. S. HUNT, - - - - - - - - - - - - 351

XXXVIII. Notice of a collection of Fishes from the southern bend of the Tennessee River, Alabama; by L. AGASSIZ, - 352

APPENDIX.—Additional Notes on the Holconoti, - - 365

XXXIX. Observations on the Development of the "Surinam Toad" (Pipa Americana); by JEFFRIES WYMAN, M.D., - 369

XL. Researches on the Development and intimate Structure of the Renal Organs of the four Classes of the Vertebrata; by W. I. BURNETT, M.D., - - - - - - - - - 374

Page.

XLI. The Numerical Relation between the Atomic Weights, with some Thoughts on the Classification of the Chemical Elements; by Prof. JOSIAH P. COOKE, JR., A.M., - - 387

CORRESPONDENCE.—Extract from a letter from Dr. W. I. BURNETT to Prof. J. D. DANA, 407.—Correspondence of M. JEROME NICKLÈS—Award of Prizes by the Academy of Sciences, 412.—Deaths and Academic Elections: Zoological Society for the Acclimation of Animals: Artificial Production of Pleochroism in Crystallized Substances, 414.—Derivatives of nitrotartaric acid: On the gluten of wheat, 415.—Natural History of Lupulin, 416.—Various Communications: Industrial Photometry, 417.—On forming vessels of gold by the aid of phosphorus: Gilding of Silk, &c.: Local anesthesis, 418.—Influence of bismuth on the ductility of Copper: On the bronze employed in sheathing ships, 419.—Traité des Poisons, ou Toxicologie appliquée à la Medicine legale, etc., par le Docteur CH. FLANDIN: Traité de l'Electricité théorique et appliquée, par AUG. DE LA RIVE: Mécanique Analytique par LAGRANGE: Leçons sur la Theorie mathematique de l'élasticité des corps solides, par LAMÉ: La règle à calcul expliquée, etc., par BENAIT, 420.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Artificial production of polychroism in crystallized substances, 421.—Rate of transmission of impressions made upon the nerves, 422.—Preparation of large crystals of sulphate of iodo-quinine for optical purposes: On the law of induction in magnetic and paramagnetic substances, 423.—On the laws of the attraction of electro-magnets, 424.—Identity of Niobium and Pelopium, 425.—Preparation and Properties of metallic Aluminum: Preparation of Aluminum by electric deposition, 427.—On the arsen-ethyls: On the alcohol of benzoic acid, 428.—Formation of nitruret of benzoyl from hippuric acid: On the exhibition of the fixed lines of the solar spectrum with ordidary flint glass prisms, by OGDEN N. ROOD, 429.

Mineralogy and Geology.—Appendix to Observations on the Homœomorphism of some Mineral Species, by JAMES D. DANA, 430.—On Descloizite, a new Mineral Species, by M. A. DAMOUR, 434.—Ancient Lake in the Colorado Desert, 435.—Quicksilver Mine of Almaden, California, by W. P. BLAKE, 438.—Conistonite, 440.

Botany and Zoology.—On the Age of the large Tree recently felled in California, by A. GRAY, 440.—Synopsis Plantarum Glumacearum, auctore E. G. STEUDEL: Lindley's Folia Orchidacea: Epistolæ Caroli a Linné ad Bernardum de Jussieu Ineditæ, et mutuæ Bernardi ad Linnæum, 443.—Localities and Habits of certain species of Insects, &c., by J. P. KIRTLAND, 444.

Astronomy.—Comet V, 1853, 444.—Obituary, Prof. A. C. Petersen, 445.

Miscellaneous Intelligence.—Abstract of Meteorological Observations made at Burlington, Vt., in 1853, by Z. Thompson, 445.—Extract of a letter from Col. J. C. Fremont, respecting his Explorations for the route of a Railroad to the Pacific, 447.—On the Action of Alkalies on Rocks, by M. Delesse, 450.—On the Prosopite of Scheerer, by James D. Dana: Geological Survey of Tennessee, 452.—Telegraphic Longitude at Brussels: The World of Science, Art and Industry, illustrated from examples in the New York Exhibition, 1853, '54, edited by Prof. B. Silliman, Jr., and C. R. Goodrich, Esq.: The Electro-Magnetic Telegraph, by Lawrence Turnbull, M.D., 453.—Outlines of a Mechanical Theory of Storms, by T. Barnett: Fownes' Chemistry for Students: A Manual of British Mineralogy, by R. P. Greg, F.G.S., and W. G. Lettsom: My Schools and my Schoolmasters, or, the Story of my Education, by Hugh Miller: Annual of Scientific Discovery: Smithsonian Contributions to Knowledge, 454.

List of Works, 455.

Index, 457.

ERRATA.

In part of the edition, (No. 50,) l. 10 from bottom, for *O. enatica*, read *O. erratica*.—P. 211, l. 10 from bottom for Ca S, *read* Cd S.—P. 220, l. 7 from top, for 1 : 3 : 4, *read* 1 : 3 : 4½.—P. 240, to the analysis, add, phosphorus 0·21.

P. 240, l. 16 from top, for tartaric acid, *read* titanic acid.
P. " l. 27 " " " " " " "
P. " l. 31 " " *erase* phosphorus.
P. 333, l. 10 and 11 from bottom, for Mr. *read* Dr.
